## LEXICON

<sup>1</sup> All employees potentially affected by a crisis will be geolocated, alerted and given instructions.

<sup>2</sup> Carlson Wagonlit Travel, AMEX, Egencia or BCD Travel included, additional cost for other feeds.

<sup>3</sup> A cross-carrier app that allows mobile teams to instantly send their GPS location and status to company decision-makers, even without data roaming. Android and iOS smartphones. App version 7.0

<sup>4</sup> GPS Tracker™ is a standalone GPS/satellite device that, thanks to the Iridium satellite network, allows employees working in remote areas to send their GPS position and status (check-in, SOS, ect.) manually or automatically at any time. The GPS Tracker™ makes it possible to locate mobile travelers when the usual means of communication are interrupted.

\*Option, available as standalone service
