Canadian offices

Security consulting services

Our specialized consultants conduct your physical security audits and provide support throughout the evaluation, planning and execution of audits, in addition to during the implementation of security and protection measures. They assist you with risk and threat assessments as well as with crisis management.

Intelligence and tracking

Our experts support you with intelligence and in your search for assets and solvency or to locate an individual, so you can make informed decisions in complex situations.

Executive protection

Whatever your needs, our qualified professionals allow you to conduct your day-to-day activities in total security.

Investigation and surveillance

From investigation to undercover operation and surveillance, our experienced investigators assist you to clarify any contentious situation you may be facing.

Cyber investigation

Our cyber investigators ensure no digital evidence is overlooked. We can assist you at every step of an investigation or dispute involving computer data, all the way to the eDiscovery phase.

Specialized services

We offer a wide range of technical and technological solutions to best meet your needs (electronic sweeping, cyber security services, polygraph services, forensic accounting, and many more).

Cyber Investigation Services

Whether the issue is exfiltration, data theft, fraud, inappropriate use of information, harassment, copyright infringement or defamation, we can help. GardaWorld's cyber investigators ensure no digital evidence is overlooked and assist you at every step of an investigation or dispute involving computer data —including evidence-gathering and preservation on site and in the cloud.

Types of disputes

- Commercial disputes
- Civil disputes
- Intellectual property disputes
- Insurance disputes
- Labour law
- Securities investigations
- Corruption/money laundering
- Forensic accounting

We can extract data from any type of device currently on the market, copy and save the contents in an e01 file format (accepted by any court of law), forensically analyze it and report our results. No matter the number and location of the data sources, our cyber investigation experts can help you manage the complexity and scope of your investigation or dispute.

Digital forensics investigation services

- Forensic analysis of computers and smartphones
- Cloud data collection and analysis
- Cyber risk analysis
- Network penetration testing
- User activity monitoring
- Assistance during the execution of an Anton Piller order
