

TopoONE by Crisis24

The ONE Platform for Security Operations
and Insightful Analytics

TopoONE by Crisis24 is a Security Operations Center (SOC) critical event management platform used by security and supply chain teams to manage risk to people, assets, and sites. TopoONE supports your global or regional SOC missions, providing 360-degree visibility of your exposures, compressing response times, and enhancing team productivity. Using powerful visualization, workflow, communication, automation, and analytics, TopoONE defines the future of security operations.

Create the Ideal Picture of Your Threat Landscape

TopoONE places no restrictions on the data sources you choose for your security operations. Seamlessly merge threat intelligence, weather information, physical security systems, and your people and asset data to create a common operating picture that is right for you and your team. Crisis24 threat intelligence APIs are native to TopoONE for a turnkey solution, with or without additional sources.

Protect Your Organization with Accelerated Response Times

TopoONE notifies you and your team of priority alerts and puts all the tools you need at your fingertips. Pre-formatted reports and mass communication options are a click away, so you can instantly notify impacted personnel and keep leadership informed. Critical events are quickly escalated for a coordinated response with integrated incident and case management.

Maximize the Value of Your Team

Replace slow, manual, and repetitive tasks with machine-speed decision-making and remediation. TopoONE manages and automates the tasks associated with responding to security alerts and incidents so your team can focus on higher-value work.

Unlock Your Data and Gain Insight

TopoONE brings all of your data together, creating a single pane of glass to unlock the insights you need to improve operations and build a more resilient organization.

Purpose-Built for Security Operations

TopoONE by Crisis24 empowers Security Operations Center teams across all industries to respond immediately to risks and critical events.

Your Data Sources

People & Assets, Threat Intelligence, Weather, Natural Disasters, Power Outages, Traffic, Flight Radar, IoT Devices & Sensors, Video Monitoring, Access Control, Alarms, and more

ONE Platform

Filtering & Prioritization, Visualization, Automation, Workflow, Sharing & Collaboration, Analytics

Rapid Response

Mass Notification (Email, SMS, Text-to-Speech, Slack, Teams, Signal, Telegram, WhatsApp), Incident & Case Management, Business Continuity

“Trust is a huge factor and I felt, from the start, that the TopoONE team would do what they said they would do – and they have delivered above expectations. The ability of TopoONE to create operational efficiencies for McKesson Security Operations has been huge.”

Ed Shubert

Vice President, Global Security Operation Center, Investigations & Crisis Management Program, McKesson
