

Safeguarding people and projects is about more than just physical security; it is about protecting reputations, avoiding disruption, and building transformative relationships with local communities that will scale the success of strategic goals and objectives.

BEYOND THE PERIMETER: WHAT IS YOUR SOCIAL LICENSE TO OPERATE?

The risk landscape has evolved and everything we do is transformational. Our deep localized understanding of the communities in which we have operated for the past 20 years, has given us a tapestry of information that provides colour far beyond just assessing and analyzing data. And we have a pioneering history of recruiting, training, and empowering local communities to take ownership of their own safety and security at all levels of civil society. Our proven approach is flexible and adaptable to specific context, yet our commitment and our ethical standards are constant, demonstrated by our industry-leading global accreditations.

We identify new threats beyond the site perimeter, reduce complexity, and empower our clients' operations.

Assessments and Audits
