

THROUGHOUT THE PROCESS: **SUPPLY CHAIN** **RISK MANAGEMENT**

Operations spread across large geographical areas, with long, cross-border routes-to-market require a coordinated, purposeful approach to effectively identify and manage the risk at every given point. Insufficient national infrastructure directly increases the risk profile of the supply chain in complex markets, making road transportation often the only viable option.

With effective asset tracking and monitoring solutions, including 24/7 emergency response, insurance coverage and support, communications provision and staffing,

supporting dedicated convoy escorts across the region, we will secure the integrity of your supply chain, safeguarding your business resilience with ethical standards, global accreditations and purposeful adherence to all local laws and standards.

We are your trusted partner, capable of delivering a multi-country, consistent solution across Southern Africa.

Supply Chain Risk Management

A fully integrated offering for your peace of mind.
