

**Decades of success**

For the past 20 years, GardaWorld has been on the leading-edge of every major advancement in the security and risk management sector, including the application of industry leading technologies.

**Life of Mine Solutions**

At every phase within a mine's lifecycle, our integrated solutions reduce risk and enhance operational value. While our layered approach is modular, dynamic and adaptable to specific contexts, clients can rely on a standard of excellence that never wavers.

**FUTURE MINING**

Our philosophy is simple: we aim to reduce the barrier between data and action, using technology to achieve better productivity in a safer environment while reducing operational cost for the mine.

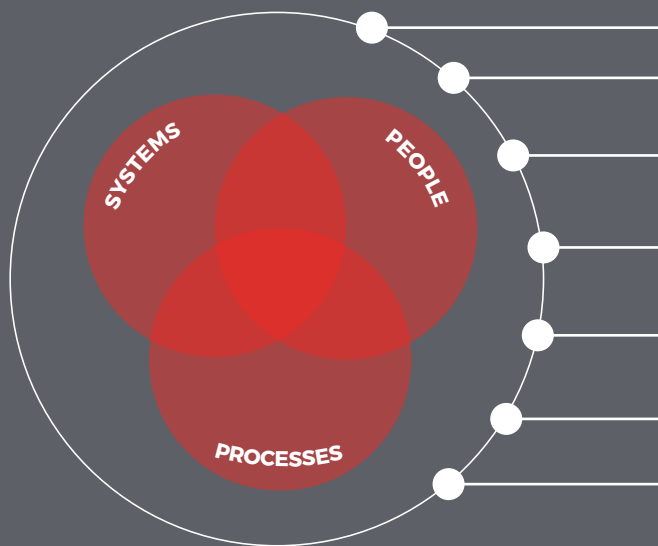

**Enhance production efficiency and reliability** by tracking every aspect of mining operations, from pit to port.

**Protect workers** through location tracking, remote operations, and monitoring of hazardous work areas.

**Boost productivity** by sharing information across all processes and business applications. Reduce risk, improve compliance, and enhance security with environmental, physical, and cyber safety measures.

**Reduce production costs** with real-time visibility of assets that identifies potential issues early, helping extend asset life\*.

\* CISCO report on the advantages of Connected Mining

**Integrate** – Every system for seamless operations

**Command** – Single live view of operations exercising authority to achieve goals

**Control** – Processes verifying information and correcting activity or ensuring correct activity

**Hyper contextual collaboration** – Multi directional collaboration. Exercising command and control

**Interpret** – Artificial intelligence, machine learning and rules engine

**Present** – Super analytics and digital twins

**Results** – Increased meaningful intelligence

**Integrated Technology Solutions are only as good as the concepts behind them.** Therefore, we always work at a nexus which integrates the following operational activities with future focused technologies and innovations:

**Full Spectrum Command, Control, Coordination, and Communications**

**Real-Time Monitoring of Critical Components**

**Real-Time Monitoring of Vehicle Fleets**

**Enforcement of Minimum Standards and International Best Practice Workforce Management – HSE**

**Real-Time Monitoring of Personnel**

**Predictive Intelligence**

**Crisis Management**

## System specialists

Our team of systems integrators, data scientists, and security professionals specialize in working across disparate systems that generate massive data volumes. At an enterprise level, our goal is to unify all these data streams and enable full visibility, transparency, and the ability to extract deep insights using a combination of automated processes, machine learning, and artificial intelligence (AI).

The integrated solutions team offer a single point of contact to DESIGN, ENGINEER, CONSTRUCT, OPERATE and MAINTAIN systems and solutions tailored to client needs. Our team is Production Risk orientated – interfacing the workforce with technology so reducing risk and increasing clients' profitability.

## GardaWorld in Africa

### Continent-wide, licensed operations

with proprietary infrastructure in 12 countries

**31,000+**

trained and certified security professionals

**95%**

local national employees

**54+**

years of experience operating in complex environments

### Fully compliant

to the VPSHR and a signatory to the UN Global Compact Statement

### Specialist Providers

in remote site security, strategic communications provision and integrated security solutions

### Divisional headquarters based in:

Dubai, London, Brussels and Nairobi

### Global reach through GardaWorld network

### Fully certified

across all operations to PSC1:2012 and ISO 18788:2018 industry standards
